	Off	Indicates the corresponding port has no connection.

Frequently Asked Questions (FAQ)

-Q1. The Power LED is not lit.

The Power LED should be lit when the power system is working normally. If the Power LED is not lit, please check as follows:

A1: Make sure the power cord is connected to the switch with power source properly.

A2: Make sure the voltage of the power supply meets the requirements of the input voltage of the switch.

A3: Make sure the power source is ON.

-Q2. The Link/Act LED is not lit when a device is connected to the corresponding port.

It is recommended that you check the following items:

A1: Make sure that the cable connectors are firmly plugged into the switch and the device.

A2: Make sure the connected device is turned on and working well.

A3: The cable must be less than 100 meters long (328 feet).

CE Mark Warning

Marking with the above symbol indicates compliance with the essential requirements and other relevant provisions of Directive 2014/30/EU (EMC), Directive 2014/35/EU (LVD).

This is a class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to make adequate measures.
